CONSERVATION RESOLUTIONS

DEAR PARTNER IN CONSERVATION,

A new year provides an opportunity to refresh and deepen our commitment to preserving the land, water, and wildlife of the San Juan Islands. We hope these ideas for "conservation resolutions" will inspire you to act on behalf of the places you love, and that collectively those efforts will help nurture the natural world, our communities, and our hearts in a meaningful way.

- INVEST by donating what you can to organizations that are working to protect the natural world for everyone.
- ELIMINATE pesticide and herbicide use, nonessential night lighting, and toxic household chemicals.
- LEARN about the world around you by reading, taking a class, or joining a field trip.
- CONSERVE by reducing, reusing, and recycling in every way you can.
- GROW native plants and trees that benefit pollinators and birds.
- ADVOCATE by letting elected officials and corporations know your thoughts about protecting nature.
- EXPLORE places that lift your spirit.
- CULTIVATE gratitude for and connection with the natural world—the precious and precarious natural systems that sustain us all.
- SHARE what nature means to you with family, friends and co-workers.
